Commercial Trucks

Isuzu trucks are manufactured in Japan and overseas to address the diverse challenges of the logistics industry and boast exceptional fuel efficiency, reliability, durability, advanced safety, and low environmental impact.

As a form of public transportation, buses are required to deliver safety, comfort, and environment-friendly performance to support people's daily lives and mobility needs. Isuzu buses are manufactured by J-Bus Ltd., a joint venture with Hino Motors, Ltd., and are sold throughout Japan under both the Isuzu and Hino brands.

After-Sales Services

We provide a variety of after-sales services that ensure optimal operation of our vehicles and products, both to our customers in Japan and internationally.

- Cloud-based fleet management service that remotely collects and analyzes vehicle operation information
- Advanced genuine maintenance system that utilizes remote data
- A comprehensive solutions program that supports customers in considering, introducing, and measuring the effectiveness of commercial electric vehicles
- A commercial vehicle information platform that serves as the basis for all of Isuzu's connected services
